### Your Earning Years Are Limited

DO your plans provide for independent support when your earning years are past?

Out of 100 men at age 25, statistics show that at age 55, only 7 will be in good circumstances, with 30 already more or less dependent. At age 65, about 5 will be independent, another 5 still working for a living and 54 dependent on others. Of every hundred widows, 82 are left unprovided for.

A savings account started now in this Bank and regularly added to during your earning years, will keep you and yours out of the "dependent" class.

A \$25 monthly deposit will, with compound interest in this Bank amount to nearly \$3500 in 10 years and to \$8211 in 20 years.

Capital \$5,000,000

## The Futility Of Strikes

The Great War taught the world the futility of war. Those nations which started and lost the war are prostrate, while those which in honor were forced to engage in the struggle and who won the war are doomed to struggle along under burdens of debt and obligations which it will require several generations to pay. And, after all, what did the Great War really achieve for the benefit of mankind? Nothing, unless it be that at long last the human family has learned the futility of war, and the absurdity of trying to maintain peace by the making of feverish and gigantic preparations for war. The creation of the League of Nations, the establishment of an International Court of Justice, and the signing of disarmament treaties, all seem to indicate that the lesson has been learned.

But while statesmen, capitalists, and labor are all agreed that war is a curse and that no effort must be left untried which will prevent a recurrence of the catastrophe which overtook the world in 1914, each and all of these three main groups in the industrial world seem content that the age-long struggle between capital and labor, employer and employee, shall continue to be waged with the crude and obsolete "strike" as the chief weapon. Yet, surely in this presumably enlightened century, and with all the experiences of the past as a guide, the able leaders in the political and industrial life of the world must realize, and do realize, the utter futility of "strikes" as a means of obtaining redress of grievances and the accomplishment of permanent reforms.

Take the present outstanding example of the use of the "strike" weapon. Last Spring hundreds of thousands of coal miners in the United States went on strike in order to enforce their demands in a controversy with the mine owners and operators. As to the rights and wrongs of the dispute we are not, so far as this article is concerned, in any way interested. Needless to say the right is not all on one side and the wrong on the other. But for five months now between half and three-quarters of a million men have been living in idleness—in itself, a national calamity because of the injurious effects on character and the inevitable development of shiftlessness and other bad habits.

For five months no wage cheques have been coming in to support these men and their families probably a total of more than two million souls, and provide them with the comforts and decencies of life. They have had to depend on the meagre doles of "strike" pay out of Union funds and which had been deducted from their income in previous years. In the final analysis, therefore, these five months have been worse than absolutely lost to these hundreds of thousands of people.

The mine owners have suffered through deterioration of their properties and machinery, and through loss of profits on operation, but their loss has been small compared with that of their striking employees because the coal still remains in the ground to be mined at some future date and sold, in all probability, at a higher price because of the shortage created by nearly half a year of non-production.

Countless thousands of other workers have been forced to work on short time because of lack of sufficient fuel to keep the industries and factories in which they were employed operating full time. Railways have been forced to reduce the number of trains in operation and schedules have been lowered. Ocean going vessels have been compelled to carry sufficient coal from foreign ports to enable them to make the return voyage because they could not get coal at American ports. And now, with winter approaching and surplus stocks of coal rapidly disappearing, the people of the North American continent are fact to face with the problem, not merely of keeping the wheels of industry revolving, but of actually keeping themselves from freezing to death in the months to come. Such coal as may be available will sell, it is feared, at an almost prohibitive price.

There are many other losses to be charged up against this "strike," as, for example, the loss of business to merchants everywhere in the mining regions because of the loss to the State resulting from the necessity of maintaining increased forces of police and military to maintain order when tens of thousands of people are living in idleness and suffering from a sense of wrong and injustice.

And what can possibly be written eventually on the other side of the ledger to offset these enormous losses? The strike will be settled sooner or later, and almost certainly in a compromise of some kind. That compromise could just as well have been reached in a conference by arbitration before the strike as now after months of suffering and loss. Even should one side gain everything for which they are holding out, that gain will not begin to compensate for the loss.

Industrial war waged through "strikes" is just as senseless, just as futile, as war waged between nations. Both bring suffering, sorrow and loss in their train, and practically no gain. But capital and labor both remain blind to this fact; each refuses to see any side but their own. And statesmen remain timid and fearful and apparently have not the courage to grapple with the thorny problem and provide by law some method which will prevent further repetitions of this same folly. It must be ended eventually, but apparently it is going to take some industrial upheaval comparable only to the Great War to bring the peoples of the world to their senses, and cause "the public" to rise in their might and say "this thing has got to stop."

## Weekly Newspaper Renders Valuable Service

Has a Field of Usefulness Peculiarly  
Its Own

The important service which the country weekly renders its community by publishing timely agricultural news, was emphasized by W. A. MacLeod, Commissioner of Publications for the Saskatchewan Government, in an address delivered by him at the Western Publishers' Short Course and Conference held recently at the Manitoba Agricultural College.

There is a vital distinction between the news field of the weekly paper and the city daily, the speaker stated, as the daily newspaper deals very largely with what might be described as "bad news," wars, revolutions, murders, accidents, calamities of one kind or another, and the weekly newspaper, dealing largely in local activities, appeals most to its readers when it devotes most of its space to "good news," information about the social life and the progress and development of the district and community, and in an agricultural community the agricultural news sent out by the Federal and Provincial Governments provides an important source of information.

Illustrations were given of how the value of agricultural news sent out in the form of bulletins or news articles was very greatly increased when the editor gave the article a local color by adding to the article some news of local conditions concerning the same subject. Information about the best varieties of cereals or forage plants is of far greater interest to readers if the editor can tell of some local farmer who is experimenting with these varieties, and news of an outbreak of insect pests gains much in value if the editor can give accurate information as to local conditions in connection with such an outbreak.

Governments, both Federal and Provincial, have invested very large sums in experimental farms and agricultural colleges where experiments are carried out of the highest importance to agriculture, and the weekly press renders a great service not only to its readers but to the country generally when the results obtained is published even if the paper cannot afford more space than merely to quote the general results and direct the reader to bulletins or reports giving more detailed and complete information can be secured.

The value of pictures to illustrate the text was referred to, but about the only way in which illustrated agricultural articles could be used by the average country weekly was when they run in the ready-print portion of the paper, and the speaker expressed his pleasure at the cordial co-operation extended by the ready-print company which supplied the ready-print for the majority of weekly papers in the prairie provinces in publishing cuts to show the best methods of identifying various insect pests and methods of control.

In closing, a reference was made to the very great demand made upon the small space available in the average country paper, and to the importance of condensing the news articles as much as possible to make them available for weekly papers as the editor should not be expected to furnish the space and prepare the articles as well. The weekly press of Western Canada was said to take a leading place in the quantity of valuable and timely farm news carried in its local pages.

## Unearth Our Resources

Ottawa Government Placing Thirty-  
Nine Survey Parties in the  
Field

The Ottawa Government is to be congratulated on taking practical steps to aid in developing Canada's natural resources by placing thirty-nine survey parties in the field in the hope of finding new deposits which will be the means of furnishing employment and railway tonnage.

These parties are to go to work in every province and the territories as well, including the Yukon. These uncovered resources will prove when opened up, to add much to the wealth of the Dominion and will tend considerably to increase our prosperity. A commendable feature of the policy is to confine the work of investigation to territory within reasonable distance of transportation routes rather than send parties into remote districts.—Montreal Herald.

## To Exhibit Alberta Tar Sands

Samples Are Being Sent to State Fairs  
In U.S.

Samples of Alberta coal and the famous Athabasca tar sands will be included in the exhibits of natural resources that the Government is sending to four state and inter-state fairs across the line. While the bulk of the displays thus being made for publicity's sake will be agricultural in character, it has been decided to show something also of the province's mineral wealth, and there will be some big pieces of coal, chosen from several mines in both the northern and southern mining fields, together with a generous portion of the bituminous sand-stuff.

Pictures of mining operations will also be included in the pictorial section of the exhibit. These will be interspersed with the elaborate showing of farm pictures now being prepared for the purpose, and will give a graphic idea of the underground riches of this province as well as of its agricultural resources.

Every knock-one man gives another is intended for a boost for himself.

Minard's Liniment for Dandruff

When a woman tries to capture a wealthy husband she evidently believes that his means will justify her ends.

## New Irrigation District

Farmers in the district east of Redlaw, Alta., have decided to form the New West Irrigation District. The area in this district will be about 4,700 irrigable acres, and every effort is to be put forth to have the construction work done this summer in order that the water may be available for the land next season.

## SUMMER HEAT

### HARD ON BABY

No season of the year is so dangerous to the life of little ones as is the summer. The excessive heat throws the little stomach out of order so quickly that unless prompt aid is at hand the baby may be beyond all human help before the mother realizes he is ill. Summer is the season when diarrhoea, cholera infantum, dysentery and colic are most prevalent. Any of these troubles may prove deadly if not promptly treated. During the summer mother's best friend is Baby's Own Tablets. They regulate the bowels, sweeten the stomach and keep baby healthy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

From a literary point of view, fame consists in having people know you have written a lot of things they haven't read.

An iceberg that rises 100 feet above the water stretches 700 feet below it.

# ASPIRIN

UNLESS you see the name "Bayer" on tablets, you are not getting Aspirin at all

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and dose worked out by physicians during 22 years and proved safe by millions for

Colds	Headache	Rheumatism
Toothache	Neuralgia	Neuritis
Earache	Lumbago	Pain, Pain

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists. Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Mono-acetic acid ester of Salicylic acid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

# British Empire Exhibition Planned To Be Greatest World Has Ever Seen

The greatest exhibition the world has ever seen is to be held in London in 1924 at Wembley Park, and will be called the British Empire Exhibition. Already great halls that will be permanent structures are beginning to rise from among the undulating slopes of one of the most charming natural parks near to the metropolis, and the quietness which reigned over the scene when the Duke of York cut the first turf last January has given place to the activities of hundreds of workmen and the incessant noise of great machines performing prodigies of labor.

A representative of The Daily Telegraph visited the site a few days ago and in company with the architects, J. W. Simpson and Maxwell Ayrton, and the engineer, E. O. Williams, went over the ground. In the course of time the halls, which are being erected and equipped by the Governments of all parts of the British Empire, will reveal themselves in classic beauty and grandeur, but at present it is only possible to marvel at the immensity of the task in hand and the progress that has been made in so short a space of time. The two buildings farthest advanced are those in which will be housed the industries of the United Kingdom. They cover a space four times the size of Trafalgar Square, while in length they would reach from the Carlton Hotel across Trafalgar Square and down Northumberland Avenue to the river.

Far away in one direction the architects' plan indicates the site of the Australian pavilion, for which the Commonwealth has voted a quarter of a million pounds, while in the opposite direction is the corresponding site, which it is hoped Canada will take up. Then there are the smaller halls of South Africa, New Zealand, India, West Africa and so on. Railways of full and narrow gauge intersect the ground, and over them there are continuously passing goods wagons laden with steel girders and other heavy stuff, or small trucks drawn by powerful little motor engines, conveying materials from one part of the grounds to another.

There are stacks upon stacks of drain pipes waiting to be buried and great piles of steel wire netting—enough, it is said, completely to encircle the earth—for use as reinforcement for the concrete, of which all the buildings are being made. The most wonderful sight of all is to be met with in the area covered by the empire stadium, where the cup-tie will be played next year. The contractors, McAlpine and Sons are making a special effort to expedite this portion of their task, and already the immense arena, which will accommodate 125,000 sightseers round a playing pitch of three acres, is assuming shape, and the skeleton of the far-flung stands is visible. Within this area there are great and extraordinary machines at work grabbing up and removing the heavy clay ground two tons at a time, leaving navvies to smooth over the surface in preparation for the turf, which will all come from another portion of the park, and is being "nursed" for this purpose. The contractors have to remove the old Watkin Tower, which was originally intended by Sir Edward Watkin to be a second Eiffel Tower, because it stood in the centre of the stadium, and the last portion of it has been blown up with dynamite.

Very complete arrangements are being made by the railways which serve the exhibition—and they are numerous—to cope with the traffic. The exhibition is nine minutes by train from Baker Street to Wembley Park on the Metropolitan Railway and a similar distance from Marylebone on the Great Central Railway, whose station Wembley Hill, is at the southern entrance of the exhibition. Wembley Station on the London and North Western Railway, and the Bakerloo tube, and Alperton, on the District Railway, are close to the exhibition grounds. There are over 140 city and suburban stations north, east, west and south of London, from which direct access to the exhibition, without change, is obtainable.

Hot liquids can be frozen by application of pressure alone.

W. N. U. 1434

## Whistling of Marmots May Be Broadcast

Novel Treat for Radio Fans if Idea is Carried Out

"The next number on tonight's programme will be a piccolo imitation entitled The Whistling Chorus, by the Rocky Mountain Marmot Singing Society of 1,000,000 voices."

Such may be the announcement to astonish the ears of any number of listening radio fans in the near future, if a proposal before the national park service of the interior department is carried through. It will be possibly the most novel treat that the numberless radio amateurs could ask, whose apparatus would tune in with a broadcasting station in Glacier National Park, in the heart of the Rockies, which would catch and transmit the shrill whistling of these small dog-like animals.

Within fifty miles of the park, in the northern part of Montana near the Canadian border, lives the largest colony of the animals on the North American continent. It is estimated there are close to 1,000,000 of them living in dense population. On still nights the wonderful shrilling chorus of the piccolo-like voices is carried miles on the rare mountain air and tourists in the camps enjoy the evening programme immensely.

It has been proposed that a receiving set and broadcasting station of 200-watt capacity, sending at a 360-meter wave length, be installed close enough to catch the voices clearly. Such power would be capable of sending throughout a radius of 1,500 miles and could be picked up almost from coast to coast.

When the full chorus is on it sounds as if a whole city of people were playing piccolos in concert.

## Soviet May Coin Platinum Money

Russia Mines Nearly All of World's Supply

A message from Europe, which may be true and may not, says that the Soviet Government has for a long time been accumulating platinum with a view to coining it. Russia produces nearly all of the platinum mined in the world, and, if there were enough of it, that metal might make a desirable basis for a hard money system. It has most of the admirable qualities that make gold the world's money metal and though it lacks that metal's universal demand, its use would certainly improve the present Russian system. But a resort by Russia to platinum as a basic money metal would be hopeless nevertheless because if Russia cornered the world's supply and continued to do so for the next hundred years it would still have less in value of platinum than the United States has in gold. In a good year at ordinary prices the total output of platinum is worth about \$10,000,000. Russia needs a billion dollars worth of gold upon which to rest a really adequate and sound monetary system.—Detroit Free Press.

## Prehistoric Drawings of Pleiades

Cave Dwellers Evidently Had Sharper Eyes than Modern Astronomers

Certain prehistoric drawings made by cave dwellers have been found, and Professor Bigourdan recently made an interesting report to the French Academy of Sciences concerning them. He states that the drawings evidently portrayed the Pleiades. The singular thing about these drawings is that they all exhibit groups of ten stars, whereas modern observers of the skies are able to perceive with the unaided eye only seven stars of this group. The ten stars which form the group are visible today only by means of a telescope or from the top of a high mountain. This raises the question as to whether the cave men were already so skilled in astronomy as to know that more stars were visible from the summit of a mountain than from the plains. If they did not possess this knowledge, we can only suppose either that primitive man was gifted with much sharper eyes than his present descendants, or else that the brightness of the Pleiades has become much diminished.

## Newspaper Short Course

R. Fahrni Elected President of Manitoba Division of Weekly Newspapers Association

Roy Fahrni, of Gladstone, Man., was elected president of the Manitoba division of the Canadian Weekly Newspapers Association, at the final session of the short course and conference of publishers in the Agricultural College, Winnipeg. C. H. Saults, Winnipeg, was re-elected to the office of secretary.

Reports indicating a satisfactory year were presented by Mr. Saults and by J. A. MacLachlan, Virden, the retiring president. Considerable discussion took place on the question of wages for job printing.

Roy Ashwin, of the Publishers' Advertising Agency, Regina, gave a report on the year's business of the firm. "The Advertising Agency and the Local Paper" was the subject of an address given by Bruce Campbell, while W. A. McLeod, Editor of Publications, Department of Agriculture, Regina, presented "Government Agricultural News," and Bruce Walker also addressed the gathering.

## Conserving a Resource

Last Remaining Band of Buffalo Not in Captivity

The Dominion Government is taking steps to protect Canada's herd of wild buffalo, the last remaining band still living without a wire fence around it. It may be mainly sentiment that prompts the preservation of the species in their far northern home, but it is a sentiment that is well worth paying for. And it may not in the long run turn out to have been a bad investment from the utilitarian standpoint. Fur coats and robes will be in demand for all time, and the hide of the bison provides material for them that is both attractive and durable. Buffalo meat is declared by those who have tried both to be superior to beef. If it pays to run fox farms and rat farms and skunk farms for the sake of the pelts, it may be found profitable to run buffalo herds for the sake of the hides and the meat.—Edmonton Bulletin.

# New Farming Areas Of Northern Saskatchewan Potential Wheat Country

In the tremendous expansiveness of the Western Canadian provinces and their comparatively recent date of settlement, it may be generally stated that the portions of the province about which little or nothing is known are more extensive than those which have been settled. The areas north of the settled regions, in fact, constitute the greater portion of each province. In Saskatchewan, after passing a little north of the Saskatchewan River, a country is penetrated which is entirely new, one not yet carefully explored, and about which, for the main part, information is rather vague. The map shows it to be a country well watered and the numerous posts of the Hudson's Bay Company indicate that it is a profitable fur country. But of its agricultural possibilities little is generally known.

Recently a collection has been made of the reports on this area, meagre enough, of the North-West Territories Government the Department of the Interior of the Dominion Government, and of two exploration parties sent out by the Saskatchewan Government, which despite their fragmentary nature indicate that vast tracts of rich agricultural land, running into many millions of acres, exist in this area directly tributary to present settlement, that climatic conditions offer no obstacle to farming there, and that where experiments in agriculture have been attempted they have been successful. The presence of large bodies of water, it is stated, have a moderating influence upon the climate, giving the area milder seasons than sections of the province further south, and the sceptical have but to give due consideration to the fact that the area is in the same parallel as the Peace River country, looked to as one of the potentially greatest wheat growing areas of the Dominion and which produced the world's prize wheat more than twenty years ago.

To all intents and purposes this area under consideration is uninhabited except for certain settlements of Indians and half-breeds, occasional church missions and a few scattered fur posts. The only agricultural production attempted in this region is such as is to be found at these little settlements, being necessarily on a small scale, but having been carried on for, in some cases, the space of half a century; what has been done, however, is sufficient to give a fairly good indication of agricultural possibilities on a large scale when farm settlements shall have filled up the area.

The area considered in the survey is that lying north of the towns of North Battleford and Prince Albert, between the Saskatchewan and the Churchill Rivers, described as a gently rising country, having much the appearance of North-Western Manitoba, the land being well adapted to farming. The soil for the main part is a rich loam with a subsoil of sandy clay, much of the land being sparsely covered with spruce and pine. Local differences make the pursuit of every kind of agriculture possible, grain growing being adapted to a large area, mixed farming suggesting itself as more profitable to a larger expanse, whilst certain sections are said to be unsurpassed in the west for cattle ranching. Along the Clearwater River and valley is described as splendid ranching country, with hay abounding and water and shelter being easily available, the rolling hills blown clear of snow in the winter affording excellent range for stock. Equally fine range is to be found in the Pembina Valley, whilst the Meadow Lake district, which is practically prairie, is described by the explorers as some of the very best land in Canada.

At Lac la Ronge, approximately one hundred miles north of Prince Albert, wheat has been raised for many years without suffering from frost, by the missionaries, whilst potatoes are raised every year with good results. In the Pembina Valley, much farther north, wheat and oats have been grown in small quantities successfully, whilst every variety of vegetables was seen in the gardens, thriving in the very best of condition—potatoes, cauliflower, lima beans, green peas, carrots, turnips, onions, lettuce, beets, parsnips and tomatoes. The Indians here grow a little barley and claim that they have never had a failure of this crop for fifty years. Small fruits also grow excellently, splendid crops being encountered of currants, gooseberries, raspberries and strawberries, all large and mature. At other places potatoes, oats and barley have been grown for thirty-five years without record of failure.

Exploring parties have estimated that in this area between the two rivers there are ten million acres of land, in large and small tracts, capable of producing crops which will enable settlers to make a comfortable livelihood. Whilst the addition of these millions of acres to the province's available farming lands may not be an important consideration at the present time when Saskatchewan has yet much surveyed land to be settled, yet the disclosure of this possession is significant of the almost limitless possibilities of agriculture in an area already producing an annual volume of 188,000,000 bushels of wheat, or half the Dominion's yield of this crop. Looking back at Saskatchewan's sparse state of settlement a quarter of a century ago, and in the light of its present production, it is not difficult to foresee the time when these northern tracts, surveyed and made more accessible, will be producing as fine crops as those raised at present in the sections to the south.

## To Wider Fields

A young country minister, noted for his jollity, was dining at a farmhouse one Sunday and when his plate of roast chicken was passed to him, he remarked facetiously:

"Well, here's where that chicken enters the ministry."

"Hope it does better there than it did in lay work," rejoined the bright boy of the family.—Boston Transcript.

Probably the oldest literary composition in the world is the Rig Veda in Sanskrit.

## Stella Tells Her Brownies About Electrical Eels

"JUST imagine an Eel," Stella, the Wishing Fairy, was saying, "that seems charged with electricity—at least people say this of it. They call it an Electrical Eel, for they no more know what to call or how to explain its strength than they can account for the electricity that descends from the sky. They know that it exists—this electric current from beyond the clouds, and they also realize that they are unable to bind and hold it; that it is more powerful than they are with its ruthlessness and strength, but this is about as far as they have positively gotten. In the same way no one can explain the strange power of the Electrical Eel. It exists and—there you are!"

"What's an Eel?" asked a Brownie. "Tell us."

"An Eel," explained Stella, "is a creature of the water. It looks like a Snake, but it is no more a Snake than you are. It is shaped on the lines of a Snake and Humans consider it very good food. At least, I should think that those Humans enjoy eating it, who know that it tastes as deliciously as the most delicate Fish. It is a Fish."

Stella has a cousin whose name is Pearl and she is the mermaid Fairy at the End-of-the-Sea, just as Stella is the Wishing Fairy at the End-of-the-Earth, and Stella had heard from Pearl of the Electrical Eel.

It seems that once upon a time a plain, ordinary Eel that had no means of defending itself against its enemies went to Pearl with a wish for her to make come true. The wish was to be able to defend itself when in danger against larger fish, and she gave it this mysterious electricity that has puzzled every one ever since.

Instead of living in the sea the Electrical Eel's home is in fresh water. It lives in lakes and ponds, and when afraid it simply uses this curious power of turning its battery of electricity upon the creature that is attacking it. The result is that the enemy is routed by being completely stunned and sinks helplessly down in the deep water, while the Eel swims away in safety.

"Often in South American fresh waters," Stella continued, "where these fish are found, the natives ride headlong on horses into some lake to catch them. Terrible fights then take place, for the Eels defend themselves by turning on the full force of their body bound electrically and often horse after horse is stunned to such an extent that they all are unable to even stand, much less carry their riders. Lots of them are drowned. It's terribly exciting—this kind of fishing."

"I think it's perfectly awful!" gentle Kinkajou exclaimed in disgust. "As far as I am concerned I don't understand, and I don't think I ever could understand what sport Humans get from giving pain and fright and—death to other creatures less strong than they are. I think that hunting is a terrible pastime."

"Well," answered the Wishing Fairy, whose heart is as big as her magic is powerful, "I rather agree with you; yet such things unfortunately exist, and

we have to look them in the face. After all, I was only telling you about an Eel that my cousin once helped."

"Can it stun and shock the fish whose bodies don't touch it?"

"Yes," answered Stella, "they are even able to numb fish that are some distance away from them."

Copyright, 1922.

## Serious Aspect To Coal Strike Situation In Nova Scotia Fields

Ottawa.—In an effort to prevent the flooding of the coal mines in Nova Scotia, Hon. James Murdock, Minister of Labor, has requested the assistance of John L. Lewis, President United Mine Workers of America. Mr. Murdock has urged President Lewis to wire to officers of the United Mine Workers of America in Nova Scotia suggesting that they do not permit the mines to be flooded, causing "irreparable damage," and that an opportunity be given for further negotiations between the men and the British Empire Steel Corporation. It is understood here that President Lewis has telegraphed to the officers of the U. M. W. A. in the Nova Scotia fields in accordance with the request of the Minister of Labor, but the terms of his message have not been received here. It is reported here that already very serious damage has been done to the mines by flooding.

Colonel Elkins, with 250 troopers from Halifax, has occupied number two colliery at New Aberdeen, after cars with a party of workers who had been sent from Sydney to man the pumps had been stoned and the workers sent back to Sydney. Reports from Pictou and Cumberland counties maintained that all is peaceful there. New Aberdeen and New Waterford are regarded as the storm centres.

Calgary.—There is no indication that the coal miners' strike in District 18, is any nearer a settlement through the renewed efforts of Hon. James Murdock, Federal Minister of Labor. The minister had a further conference with the men's officials, but without any satisfactory results.

### Cattle Men Appeal Against Tariff Duties

Claim High Rates Hurting Trade Between U.S. and Canada

Washington.—Believing they will be greatly harmed by the emergency tariff duties on cattle and the cattle duties proposed in the new tariff bill, Western Canadian cattle growers have sent individual letters to more than 30,000 United States farmers urging a change in the rate. The Canadian cattle men have also appealed to the Senate Finance Committee, House Ways and Means Committee and individual members of both Houses of Congress.

The Canadian cattle men seek to show the high rates do not benefit United States farmers, and even actually hurt them by shutting off from the United States desirable "feeder cattle" which could be fattened in the United States to the advantage of the farmers in this country. Further, the Canadian cattle men point out that the high rates existent and proposed are hurting trade between the United States and Canada.

### Ontario's Provincial Bank

People Have Deposited One Million In Six Weeks

Toronto.—The province of Ontario Savings Department has written one million dollars' worth of business in the first six weeks in operation. Over 100 representatives of the Assured Savings' Branch of the Provincial Bank held a dinner last week and reviewed the work, which has been sensational in Ontario.

Congratulations have been showered upon the staff of Ontario's Bank for their energies which have attracted thousands of citizens. Mr. McKenzie, director of the Province of Ontario Savings Department, told of the initial obstacles which confronted the members, and said the loyalty of those who launched the project was responsible for its huge success in so short a period.

**Refreshes Weary Eyes**  
When your eyes feel dull and heavy, use Murine. It instantly relieves that tired feeling—makes them clear, bright and sparkling. Harmless. Sold and recommended by all druggists.

**MURINE**

### World Mourns Death Of Lord Northcliffe

Messages Significant of Esteem in Which Publisher Was Held

London.—World-wide regret at the death of Viscount Northcliffe continues to be evinced by the flood of telegrams and cable messages received by the family and published in Northcliffe papers. The messages sent to Lady Northcliffe by the King and Queen and other members of the Royal Family and the tribute from President Harding are significant of the esteem in which the great publisher was held, says the Times.

The President of France, the Viceroy of India and the Dominion and Commonwealth Premiers are as one with distinguished men of the United States in attesting to Northcliffe's work and the eminence of his achievements. The scores of messages occupied more than a page of the Times.

### Dublin Silent While Leader Is Buried

All Activities Suspended During Funeral of Arthur Griffith

Dublin.—Ireland buried another of her distinguished sons. Arthur Griffith was laid to rest in historic Glasnevin Cemetery, after services of impressive solemnity in the beautiful cathedral of the Immaculate Conception. Many attended the Requiem High Mass for the repose of the soul of the departed leader—celebrated with all rites and ceremony of the Roman Catholic Church. The cathedral was crowded, and the thousands unable to gain admission to the edifice stood in the streets outside following as nearly as possible the service they could not see.

All activities in Dublin were suspended during the funeral.

### American Judge Is Suspicious

Thinks Many Canadians Obtaining Divorces in Detroit Evading Law

Detroit, Mich.—Convinced that hundreds of Canadians are obtaining divorces in Detroit every year by falsely representing themselves as residents of the city, Judge Richter has ordered Edward Pokorney, clerk to the court, to investigate the residence of every Canadian who files suit for divorce.

"I will not grant a decree in any Canadian case until Mr. Pokorney assures me that one of the parties has really lived here two years as required by the statute," said Judge Richter. "So many suits are being filed by Canadians that it has made me very suspicious."

### POSSIBLY YOUR OWN WIFE

She may not look so young and pretty as she used to. If her cheeks are hollow and pale, if she is tired and nervous, her system needs a good regulating with Dr. Hamilton's Pills, a real medicine that is noted for restoring the bloom of health to sickly girls and women. Dr. Hamilton's Pills tone up the entire system. Complexion quickly becomes rosy, spirits rise, strength increases daily. Health, vigor and good looks will soon return to a faded woman. If she uses Dr. Hamilton's Pills. Sold everywhere, 25c per box, or from the Catarrhzone Co., Montreal.

### Three Hurt In Mine Accident

Glace Bay, N.S.—William Cameron had a leg broken, Joseph McNeil received injuries to his head, and Daniel MacDonald was badly shaken, when the car in which they were about to descend into No. 2 mine at New Aberdeen went up instead of down and struck violently against the head of the cage shaft. Safety catches prevented it from plunging to the bottom of the 900 foot shaft.

### Mount Robson Scaled

Edmonton.—Windsor Putnam, of San Francisco, with Jack Hargraves, Canadian guide, reached the peak of Mount Robson recently. This is the second time in history that Mount Robson has been climbed. It is the highest point in the Rockies.

### WESTERN EDITORS

Ernest G. Pickup, Editor and Proprietor of The Chronicle, Shellbrook, Sask.

### Agree With Premier Poincare

Stand Taken at London Conference is Approved by French Cabinet

Rambouillet, France.—Sitting under the presidency of President Millerand, the French Cabinet at its session here gave unanimous approval to the attitude taken by Premier Poincare at the recent conference of Allied Premiers in London, and also discussed the question of a moratorium for Germany.

On the matter of a moratorium, it was decided to await the forthcoming decision of the Reparations Commission, but plans were perfected regarding the measures to be adopted should the decision of the commission fail to agree with the French viewpoint.

Another decision arrived at was that for the time being the Government need not call an extraordinary session of Parliament, so that the deputies and senators might be acquainted with the exact situation and the programme of the Government. Freedom of action was reserved, however, to consult with Parliament in the event that the plans adopted should require legislative endorsement.

### Jewish Orphanage Burned

Montreal.—Twelve persons perished in the fire which destroyed the Jewish Boys' Orphanage at Shawbridge. Eight of the victims were inmates, the others being the janitor, his wife and their two children.

It was thought the fire originated in the basement. The Jewish Boys' Home was a summer annex of a Montreal institution. It accommodated 55 lads between 7 and 15 years of age. The building was of brick construction and three storeys high.

### Death of Former C.P.R. Official

Winnipeg.—William Cross, aged 50, formerly assistant to the second vice-president, Canadian Pacific Railway, died at his home here. Mr. Cross was a native of England, coming to Canada in 1863. He was for many years connected with the mechanical department of the Montreal shops, and on his transfer west handled mechanical matters for western lines. After 40 years' service with the C.P.R. Mr. Cross was superannuated in 1904.

### French War Ace Injured

Clement-Ferrand, France.—Gilbert Sardinier, the French "ace," who during the war brought down 15 German planes, was badly injured when in a Clement gliding triplane competing in the international gliding contest here, he was dashed to the ground after the control of the machine refused to respond. The machine was caught in a 30-mile wind and is a complete wreck.

### NOTHING TO EQUAL

**For Sprains and Bruises**  
The first thing to do when you have an injury is to apply Minard's famous Liniment. It is antiseptic, soothing, healing and gives quick relief.

## Plan Ways And Means To Assist Farmers In Marketing Grain

### Resents Criticism Of American Surgeon

Canadian Should Standardize Canada's Hospitals, Says Dr. McKeown

Toronto.—"If it is necessary to standardize the hospitals in Canada, it should be done by someone in Canada." This was the reply made by Dr. Walter McKeown, of St. Michael's Hospital to a criticism of Ontario hospitals made by Dr. M. T. McEachern, director of the American College of Surgeons.

Dr. McKeown continued: "We leave too much to the Americans and to such institutions as the Carnegie and Rockefeller Foundations."

### Employment Increasing

Improvement in Labor Market is Very Perceptible

Ottawa.—"The volume of employment is undoubtedly on the upgrade," was the optimistic view expressed by R. A. Rigg, newly appointed director of the Employment Service of the Department of Labor.

"Business is recovering unquestionably," he said. "We have touched the bottom of the ladder and we have begun to climb. We cannot expect to reach the top suddenly, or without considerable effort, but we are facing the right direction. The improvement in the labor market, though gradual, is very perceptible."

Mr. Rigg did not anticipate as hard a winter as the last two have been.

### Disastrous Fire At Barons

Post Office, Postmaster's Residence and Implement Store Destroyed

Calgary, Alta.—A special despatch to the Herald, from Barons, Alta., says:

Fire completely destroyed the post office, residence of the postmaster, and the Barons Implement Company's warehouse and store.

The implement store and stock was valued at \$20,000, very little insurance being carried. The post office and residence of Postmaster Andrews, were valued at more than \$6,000, and were fully covered by insurance.

### New South Wales Immigration

London.—The Government of New South Wales has agreed to the principle of the immigration scheme under which the Australian Commonwealth Government, New South Wales and Great Britain each pay a third of the cost of bringing out land settlers from the United Kingdom to New South Wales, says a Reuter despatch from Sydney.

### Indian Village Bombed

Simla, British India.—In retaliation for an attack on a member of the Royal Welsh Fusiliers, near Lawsha, three fighting planes flew over the village of the tribesmen and dropped heavy bombs. Three persons were killed and two wounded, four houses were wrecked, a large area of crops was damaged, and a number of cattle were killed.

### Exchange Flour For Welsh Coal

Welland, Ont.—The Maple Leaf Milling Company has arranged to take a load of flour to Wales soon, and on returning the cargo will consist of Welsh coal in order to assist the local fuel situation. The matter was given hearing in the City Council meeting and the Maple Leaf Milling Company commended for its efforts.

### German Debt Increases

Berlin.—From August 1 to August 10, the floating debt of Germany increased 4,500,000,000 marks, the aggregate on the later date 213,400,000,000 marks.

### Troops Demobilized

Columbus, Ohio.—Ohio National Guard troops sent to the various Ohio coal fields during the strike, were ordered returned to their armories and demobilized by Governor Davis.

Regina.—The Federal Government might assist farmers by calling a conference of bankers to devise ways and means to enable farmers to hold their grain long enough to prevent the usual fall glut of the market with its consequent flattening of prices.

This in effect is the suggestion wired by Premier Charles A. Dunnington to Premier King in reply to the latter's telegram offering the co-operation of the Federal Government in the provision of measures as a substitute to the Wheat Board now that the latter has fallen through and asking for further suggestions from both Alberta and Saskatchewan Governments.

At the same time Mr. Dunnington announced that he could call another conference this fall of creditor classes other than bankers with a view of securing their co-operation by extending leniency to farmer debtors. Mr. Dunnington pointed out, however, that the banks come within Federal jurisdiction, and to come to any agreement with the bankers would entail meditation by Dominion authorities.

Edmonton.—"Nothing more to be done," is the substance of Premier Greenfield's reply to the wire from Ottawa asking if the Dominion Government can be of further assistance in regard to the Wheat Board. With the failure to secure a chairman and vice-chairman for the board the incident is closed for the time being as far as this province is concerned, and no further action at the present time is desired or contemplated.

Mr. Greenfield says that the Prime Minister's suggestion in reference to creating an open market for wheat does not raise any new point, since the market is already open and would not be otherwise until the board had started to function. Nor is there anything in the way of British and other buyers making such contracts as they may please.

The Provincial Government has nothing further to suggest just now, says the Alberta Premier, and is acknowledging the offer from Ottawa with thanks, but without asking for any further action.

### May Be Redistribution

Toronto.—With the postponement of the next provincial election to the fall of 1923, gossip at the Parliament Buildings has found a new subject in the probability of a redistribution of the Ontario electoral districts before the voters again go to the polls. The most important changes are expected to materially increase the representation of the cities in the new house.

## WORLD HAPPENINGS BRIEFLY TOLD

It has been definitely announced by Premier Haschereau that a radium institute for the cure of cancer will be established in Quebec before long.

While working at breaking up the obsolete battleship St. Vincent, at Dover, David Wilson, of Birkenhead, was killed by ten tons of armour plating falling on him.

Government engineers will shortly instal fish ladders at Stamp River Falls, B.C., leading to Great Central Lake, to create a new spawning ground for salmon. The lake is on the west coast of Vancouver Island.

Necessity of an election of members for the Yukon Legislature, which had been fixed for September 11, was eliminated when candidates for three districts concerned were elected by acclamation.

The London Daily Chronicle announces that its net circulation now exceeds 1,000,000 copies a day. This represents the remarkable increase of more than 200,000 copies daily attained during the last twelve months.

Twenty cases marked "old iron," which had been embarked on board the steamer Mimi at Hamburg, have been found by the Italian authorities at Naples to contain pistols. They have been seized.

A Reuter despatch from Moscow says that as a result of intervention by the British Mission, the offices of the White Star and the Canadian Pacific Railways, which were closed by the Soviet Government, have been re-opened.

Admiral Sir John De Robeck has hoisted his flag as commander of the Atlantic fleet, succeeding Sir Chas. Madden. Sir John has been commander-in-chief of the Mediterranean fleet for about three years. He was born in 1862.

The Prince of Wales has fixed Friday, October 20, for his visit to the Guildhall to receive an address from the City Corporation and to lunch with them, in connection with his eight months' tour of the Dominions, India and Japan.

## COULD HARDLY STAND AT TIMES

**Hips, Back and Legs Would  
Have That Tired Ache**

Everett, Washington.—"For several years I have had trouble with the lower part of my back and my hips and my legs would ache with that tired ache. I could hardly stand on my feet at times. I was always able to do my work although I did not feel good. I saw Lydia E. Pinkham's Vegetable Compound advertised and having heard several praise it I decided to try it. I feel first-rate at the present time. It has done wonders for me and I keep it in the house right along. I always recommend it to others who are sick and ailing."—Mrs. J. M. SIBBERT, 4032 High St., Everett, Washington.

To do any kind of work, or to play for that matter, is next to impossible if you are suffering from some form of female trouble. It may cause your back or your legs to ache, it may make you nervous and irritable. You may be able to keep up and around, but you do not feel good. Lydia E. Pinkham's Vegetable Compound is a medicine for women. It is especially adapted to relieve the cause of the trouble and then these annoying pains, aches and "no good" feelings disappear.

It has done this for many, many women; why not give it a fair trial—now.

W. N. U. 1434

## Prince Designed Gift

**Personal Touch In Wedding Present  
to Lord Mountbatten**

There was a personal touch about the Prince of Wales' wedding present to Lord Louis Mountbatten which was particularly charming. It was a gift of his own design. A silver figure of Atlas supports on its shoulders a silver globe whereon is traced in enamel the route of the Renown on her Indian and Australian voyages, in which the two young men were shipmates together.

Nothing could be more appropriate than such a present, which commemorates the comradeship of those memorable months. Wedding presents are too often conventional rather than personal, but perhaps the gift of the Prince will set a new fashion. This silver figure will always remind Lord Louis Mountbatten, as no cigarette case or tea set could do, of the experiences they shared together. Such a gift shows that the Prince is not only a cousin but also a friend.—From the Overseas Daily Mail.

## THOUSANDS CONVERTED

Through ignorance, many have suffered aches and pains long thought incurable. But doubt quickly turns to belief when sciatica, lumbago and neuralgia are healed with Nerviline. Its soothing healing powers are really wonderful. Nerviline sinks in quickly, it penetrates into the sore muscles and brings grateful relief. The hundred and one minor ills that come to every family yield quickly to Nerviline. Try it. 35c at all dealers.

## Grant For Alberta

The Federal Government has endorsed a grant of \$66,965 to the province of Alberta "for the purpose of aiding and advancing the farming industry by instruction in agriculture." The payment will be made from the revenue fund of Canada for the year ending March 31, 1923, and under the authority of the Agricultural Instruction Act.

## IRRITABLE PEOPLE

**Are Usually Victims of Poor Blood  
and Weak Nerves**

Irritability is one of the manifestations of nervousness, and it becomes worse as the nerves become more unstrung and approach a state of exhaustion. No one is irritable from preference, and this state is often only the outward expression of a great deal of physical suffering which friends do not realize. It is accompanied by headaches, sleeplessness, nervous indigestion and depression. Unless it is promptly checked more serious trouble develops.

The treatment for the earlier stages of nervousness, as well as the more advanced condition, is one of nutrition of the nerve cells, requiring a tonic. As the nerves get their nourishment from the blood, the treatment must be directed towards building up the blood. Dr. Williams' Pink Pills act directly on the blood, and have proved of the greatest benefit in a great many cases of this kind. A tendency to anaemia or bloodlessness, shown by most nervous people, is also corrected by these tonic pills. This is shown by the case of Mr. Kenneth R. McDonald, Tarbot, N.S., who says: "For a long time I was a severe sufferer from nervous trouble, with the result that I grew pale and weak, lost weight, slept poorly, and always felt tired out. Various medicines I tried had no beneficial effect, until finally I was persuaded to try Dr. Williams' Pink Pills. I found these just what I needed, as after taking them a couple of months I not only gained in weight, but felt stronger, more cheerful and better in every way. I feel that I cannot praise these pills too highly for what they have done for me."

You can get Dr. Williams' Pink Pills through any dealer in medicine, or by mail, at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

## How Far Can You See?

**Details Cannot be Distinguished 600  
Yards Away**

When it comes to judging distances the average man is apt to go sadly astray.

Careful tests show that the following are distinguishable at 100 yards: The parts of the body, slight movements of the head, arms, or legs, and the details of dress.

Let the man stand another 100 yards away and his face becomes almost a blur, it being impossible to distinguish the features.

Let him stand 400 yards away and his face is a speck, but it is still possible to perceive movements of the legs or arms. When he is 600 yards away he is merely a form.

Minard's Liniment for sale everywhere.

## MAGIC BAKING POWDER

Guaranteed to be the purest and best baking powder possible to produce. Because of the purity and high quality of the ingredients of Magic Baking Powder its leavening qualities are perfect and it is therefore economical.

E.W. GILLET COMPANY LIMITED  
WINNIPEG TORONTO, CANADA. MONTREAL

## Best Of Reasons

"Why Germany did not send out her fleet to attack that of the British when the latter was scattered all over the world in the early part of the war is explained in the second volume of the official history of German sea war, now being published here," according to a Berlin dispatch. The answer to that is easy. It was because the British fleet fortunately, was not "scattered all over the world" at that time. Are the Germans still trying to fool themselves with such inventions as this regarding the war.—Buffalo Express.

## Ladies Remove Their Corns In A Simple Way

No pain, no trouble, costs only a quarter. It is a very simple thing to paint on a small application of good old "Putnam's" night and morning. To remove corns, to get entirely free from them, use Putnam's Corn & Wart Extractor. It is guaranteed. 25c at all dealers. Refuse a substitute.

## Wheat to Japan

That Western Canada will ship considerably more wheat to Japan the coming season than formerly, is the statement made by the director of a large Japanese grain firm at present visiting Alberta.

## "COLD IN THE HEAD"

is an acute attack of Nasal Catarrh. Those subject to frequent "colds in the head" will find that the use of HALL'S CATARRH MEDICINE will build up the System and render them less liable to colds. Repeated attacks of Acute Catarrh may lead to Chronic Catarrh. HALL'S CATARRH MEDICINE is taken internally and acts through the Blood on the Mucous surfaces of the System, thus reducing the inflammation and assisting Nature in restoring normal conditions. All Druggists. Circulars free. E. J. Cheney & Co., Toledo, Ohio.

## Canadian Trade With Mexico

The Canadian Government will shortly appoint a trade commissioner and an assistant trade commissioner to report upon and investigate openings for Canadian trade in Mexico. The Order-in-Council containing the authority for the appointments says that "Mexico offers a field for organizing and extending healthy trade relations between that country and Canada."

## Experimenter Blacklisted

**Attempted to Cut Trees With Rapid  
Fire Gun**

Felling trees at Castlebrook, Wash., with a red hot wire and a rapid fire gun to test some new inventions have placed Rudolph Mayer, the experimenter, on the forest service blacklist.

The wire not only burnt its way deep into a big red cedar trunk but also started a fire that quickly spread to adjoining pitchy timber.

The wire was carried to and from rapidly by an electric motor, the heat generated by friction being intended to sever the wood tissues quickly and smoothly.

Mayer's other idea was to aim a rapid fire gun into the trunk of a tree slowing turning the muzzle across the diameter. In the experiment the pointed bullets felled a two-foot tree but many passing through the trunk chipped large chunks off other trees and frightened the lumberjacks a long distance off.

**A Remedy for Earache.**—To have the earache is to endure torture. The ear is a delicate organ and few care to deal with it, considering it work for a doctor. Dr. Thomas' Eclectric Oil offers a simple remedy. A few drops upon a piece of lint or medicated cotton and placed in the ear will do much in relieving pain.

"Father, what is fate?"  
"It's crossing the busy Main Street three time a day for three years, and then being run over by a farm wagon in the country."

**The Many-Purpose Oil.**—Both in the house and stable there are scores of uses for Dr. Thomas' Eclectric Oil. Use it for cuts, bruises, burns, scalds, the pain of rheumatism and sciatica, sore throat and chest. Horses are liable very largely to similar ailments and mishaps as afflict mankind, and are equally amenable to the healing influence of this fine old remedy which has made thousands of firm friends during the past fifty years.

## Less Foreclosures

A considerable reduction in the number of foreclosures on Southern Alberta farms has resulted as a consequence of recent provincial legislation, it is stated.

## More Automobiles in Japan

Despite the high tax—\$400 yearly on the cheapest cars to \$1,500 on the higher class ones—despite bad roads and business depression, the use of automobiles is increasing rapidly in Japan. The increase has been particularly noticeable in cars which ply for hire in Tokio, Yokohama, and other cities, the charge for which is about \$4 an hour.

**ECZEMA** You are not experimenting when you use Dr. Chase's Ointment for Eczema and Skin Irritations. It relieves at once and gradually heals the skin. Sample box Dr. Chase's Ointment free if you mention this paper and send 2c stamp for postage. 60c a box; all dealers or Edmanson, Bates & Co., Limited, Toronto.

## Notice to parents having children at school.

According to chapter 29, section 158 subsection 13 of the School ordinance.

It shall be the duty of every Teacher:

To notify the Chairman of the Board whenever he has reason to believe that any pupil attending school is affected with or exposed to smallpox, cholera, scarlatina, diphtheria, whooping cough, measles, mumps, trachoma or other infections or contagious disease and to prevent the attendance of any pupil so affected or exposed or suspected of being affected or exposed until furnished with the written statement of a physician or the chairman of the board that that such contagious or infectious disease does exist or that all danger from exposure to any of the has passed away:

ALEX REID  
Secretary-Treasurer
